## 4 开发背景 D

OSEK 标准旨在制定汽车电子标准化接口，主要定义了三个组件：实时操作系统 (OSEKOS) , 通讯系统 (OSEKCOM) 和网络管理系统 (OSEKNM) 。OSEK 操作系统始于 20 世纪 90 年代，是第一个商业化的汽车嵌入式操作系统。

The OSEK standard aims to establish standardized interfaces for automotive electronics, primarily defining three components: the real-time operating system (OSEKOS), the communication system (OSEKCOM), and the network management system (OSEKNM). The OSEK operating system, which began in the 1990s, was the first commercialized automotive embedded operating system.

AUTOSAR 组织成立于 2003 年，主要由欧洲汽车制造商、部件供应商及其他电子、半导体和软件系统公司联合建立。致力于为汽车工业开发一个开放的、标准化的软件架构；希望大家“在标准上合作，在应用上竞争”提高基础平台的稳定，降低成本，提高控制器产品开发质量和速度。2006 年底发布了 2.1 版规范，2008 年发布 3.1 版本开始产品化；后续逐步增加了功能安全，以太网等内容，目前广泛使用 2014 年后发布的 4.2.1 和 4.2.2 版本，以及 4.3.1 版本。

The AUTOSAR consortium was established in 2003, mainly by European car manufacturers, component suppliers, and other electronics, semiconductor, and software system companies. It is dedicated to developing an open, standardized software architecture for the automotive industry; The goal is for everyone to "cooperate on standards and compete on applications," improving the stability of the basic platform, reducing costs, and enhancing the quality and speed of control unit product development. The 2.1 version of the specification was released at the end of 2006, and the 3.1 version was productized in 2008, subsequently, functionalities such as functional safety and Ethernet were gradually added. The widely used versions are 4.2.1 and 4.2.2, released after 2014, as well as version 4.3.1.

汽车在电动化、网联化、智能化的大趋势下，电子电器部件日益增多，电气结构越加复杂，整车开发周期不断缩短。平台化、智能化的基础软件起到至关重要。

With the overall trend towards electrification, connectivity, and intelligence of automobiles, the number of electronic and electrical components is increasing, the electrical structure is becoming more complex, and the vehicle development cycle is continuously shortening. The platform-based, intelligent basic software plays a crucial role.
